FOR IMMEDIATE RELEASE

GreenFiber Employees Selected for Built Green Colorado Hall of Fame

Denver, CO – October 22, 2003 – Two US GreenFiber Employees were selected to join the Hall of Fame of Built Green Colorado, a program that encourages builders to build energy efficient homes while preserving natural resources. Dan Rizzo, Contractor Channel Manager, and Paul McCluskey, Contractor Territory Sales Manager were chosen among fifteen nominees because of their exemplary commitment to the Built Green program and their ability to educate builder clients on the importance of high-performance homes.

"What we look for in a Sponsor is not simply a company that will contribute dollars to our Program, but an active partner that aligns with our mission to recruit and educate builders. Greenfiber, and particularly Dan Rizzo and Paul McCluskey, have met and exceeded our expectations and have proven themselves to be the type of industry partners that we hope to have a relationship with for years to come" (Traci D'Alessio, State Coordinator, Built Green Colorado).

In addition to taking an active one-on-one role in educating a builder, Greenfiber made educational opportunities to the marketplace more available and affordable. They were instrumental in having Built Green partner with EEBA and E-Star for the Houses that Work seminar- by far the most successful training event Built Green Colorado has had to date.

Rizzo and McCluskey will be inducted into the Hall of Fame during a ceremony held Thursday, October 23 in Denver in which the Built Green Award winners for 2003 will also be announced.

Built Green Colorado is a statewide program promoting green building in the Denver metro area and all of Colorado. The largest green building program in the nation, Built Green Colorado is administered by the Home Builders Association of Metro Denver (HBA), and supported by the Governor's Office of Energy Management and Conservation (OEMC), E-Star Colorado, and the Colorado Association of Home Builders and many local HBAs around the state. More information can be found at www.builtgreen.org or by calling 303.778.1400.

Established in 2000, US GreenFiber LLC is a quality-conscious, low-cost provider of light density blown-in insulation with national manufacturing and distribution capabilities. GreenFiber is a 50/50 joint venture of Louisiana-Pacific (NYSE:LPX) and Casella Waste Systems, Inc. (NASDAQ:CWST). GreenFiber has the capacity to turn what has previously been an environmentally friendly "specialty" product into a major competitor on the building products scene.
